English

Q tea

History of **tea**, noun

Etymology

Borrowing from **Modern Dutch** *thee*, ‘tea’; from **Malay** *teh*, ‘tea’; from **Min Chinese** *tê*, ‘tea’.

Note — Surprisingly, the English were among the last European peoples to adopt tea. The shrub, the leaf and the drink were completely unknown before 1650, but at the turn of the eighteenth century, 200,000 pounds of *Camellia sinensis* leaves were already being consumed annually, and ten times that amount some fifty years later! In the early 1800s, the drink even rivalled beer in popularity. But it was not until the 1860s that the famous English “afternoon tea” ritual accompanied by a light meal developed nationwide popularity. It became known as “five o’clock tea” given that it usually took place around that hour. By around 1880, the custom had crossed over to continental Europe, including France, where *le five o’clock*, meaning “five o’clock tea”, was even adopted as a noun.

The form *tea* was attested starting in 1655 as *tay*, *tey*, *tee* or *tea*. It is ultimately from the Amoy dialect of Min Chinese *tê* (茶), probably via transitory Dutch and Malay etymons. Amoy, now Xiamen, was a major trading port in China and was shipped in large quantities to European countries. *Tea* entered European languages, including French.

Tea shares its etymological origins with the familiar expression *chai tea* an etymolog
